SUMMARY

Enthusiastic MCA student with strong foundations in full-stack web development, problem-solving, and building scalable applications. Passionate about creating clean, efficient, customer-focused solutions and eager to contribute to enterprise-grade software within collaborative engineering teams.

EDUCATION

Master of Computer Applications, PES University — 2024 – Present
GPA: 7.4 / 10.0

Bachelor of Computer Applications, SVR College — 2021 – 2024
GPA: 8.16 / 10.0

TECHNICAL SKILLS

Programming: Python, Java, JavaScript
Web Development: HTML, CSS, Bootstrap, **React**, Angular (Basics), **Flask**, REST APIs
Backend: Node.js, Express
Database: MySQL, SQLite, MongoDB
Tools: Git, GitHub, VS Code, Linux/UNIX (Basics), Figma

PROJECTS

Simple Expense Tracker (Angular) — GitHub
Built a responsive expense tracker using Angular with reusable components, CRUD operations(Create,Read, Update, Delete), and real-time spending summaries.

Text Summarizer (Flask + Python) — GitHub
Developed a text-summarization tool using Python (TF-IDF + CountVectorizer) and Flask APIs to generate concise, readable summaries efficiently.

DiaHeart Care — Full-Stack Health Platform (Ongoing)
Created a React + Flask + MySQL health platform with authentication, dashboards, user history, PDF reports, and ML-assisted predictions.

INTERNSHIP

Front-End Developer Intern, VTech Integrated Solutions — Mar 2024 – Apr 2024

- Built responsive UIs using HTML, CSS, JS, Bootstrap.
- Improved UI consistency and optimized layouts across devices.

CERTIFICATIONS

- Python: From Zero to Hero Bootcamp — Udemy
- Web Development Bootcamp - Udemy
